Environment, Health, Welfare and Safety Policy statement

ALT Technologies recognizes and accepts its responsibility towards the environment, health, welfare and safety as an integral part of its activities.

This policy statement is applicable for all ALT Technologies plants worldwide.

Through management leadership and employee participation ALT Technologies is committed to:

- The establishment, the implementation and maintaining of the environment management system.
- Complying with environmental laws, regulations and other requirements laid out by international and local laws.
- Continuous improvement of environment performances through the establishment of procedures, regular audits, targets, and reviews.
- Providing education, training, information, and the right tools to ensure that employees can work safely, efficiently and to prevent negative environmental impacts.
- The implementation of programs to prevent pollution and reduce waste.
- The responsible use of energy sources (water, gas, electricity, etc.) and put great emphasis on the use of renewable and environmentally friendly energy sources and on the energy efficiency of the related products, processes and services.
- The Corporate Carbon Footprint GHG (Greenhouse Gas emissions Scope 1 to Scope 2) and aims to become on term climate neutral.
- An open relationship with the environmental authorities and other public bodies.

AL T Technologies,

Jean-Luc Verstraeten

CEO
